

HOW TO USE THE DVR FEATURE

First you have to download and install 3 plugins. Once you install the 3 plugins you have to re-download the collaboration video plugin and re-install it. Once all of the plugins have been installed please restart Internet Explorer.

Log into your collaboration session like normal and select your session. You can record any of the video feeds that you want, but you have to restart the recorder every time you change the camera. Follow the directions below on how to use the recording feature.

1. Right click on the video feed that you want to record and a menu will pop up (*as shown in figure 1.1*).

Figure 1.1

2. Click on the disk and **Save Video Stream...** window will pop up and you can name your recording what ever you want (*as shown in figure 1.2*).

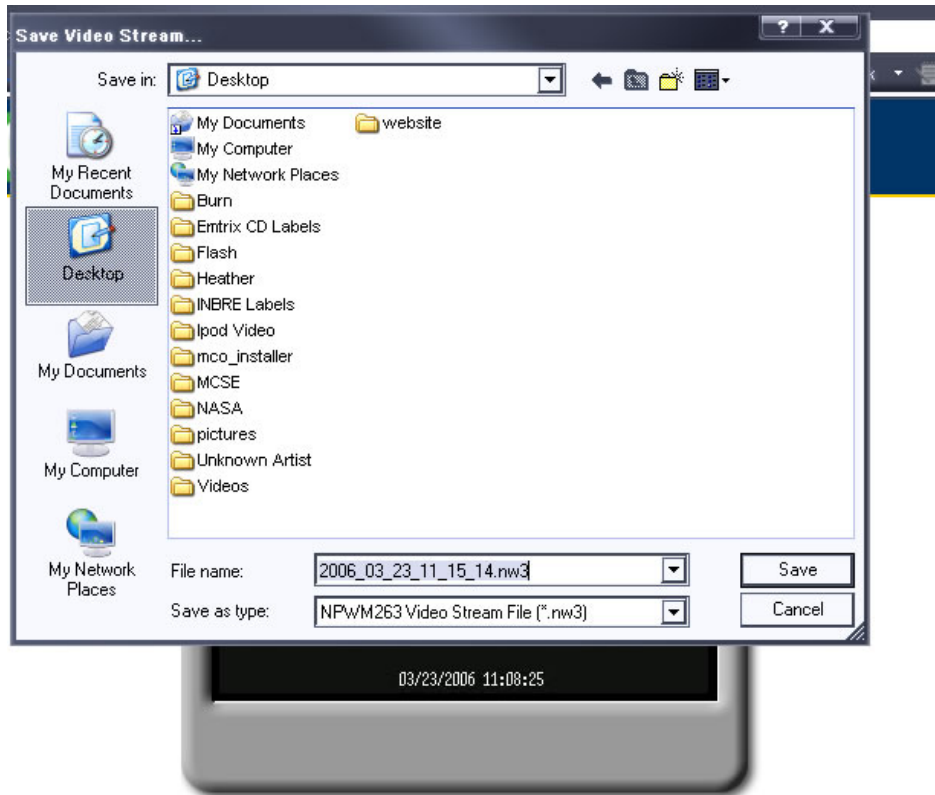

Figure 1.2

3. Once you are done recording just right click on the video feed and click the stop button and the live video stream will stop (as shown in figure 1.3). To start the live video stream again just right click the video feed and click on the play button (as shown in figure 1.4).
